2009 European Stud Fees

By Michael Youngs

IMMINENT CORRECTION ARRIVES

With 15 years of continuous growth in the European breeding industry and particularly strong expansion in Ireland, the spectre of overproduction had been looming large for years. The warnings were clear, but, as in any bubble economy, plenty of investors were still willing to join in or reinvest while the going appeared good, despite escalating production costs and lagging prizemoney. Now the recession has hit the European breeding industry hard.

The Irish economy had already begun weakening before the credit crunch went global, and the combined impact was particularly harsh for consignors at the Goffs and Tattersalls Ireland sales where withdrawal numbers were high and clearance rates desperately low. The impact was less severe in France where prospects of Breeders Premiums offered some security.

The need for stallion farms to reduce fees was very clear. However, there was a greater reluctance to admit to the severity of the decline than was the case in North America. Partly this could be because European production and racing costs have always been disproportionately

high compared to prizemoney and also because Europe has always had a culture of more flexible negotiation between breeders and stallion owners irrespective of published fees. There is no better example of this than the four highest-value stallions listed with fees as “private” for 2009. Three of those sires are the Coolmore-based **Galileo**, **Montjeu**, and **Danehill Dancer**. The fourth is the now blind and aging German-based **Monsun**, whose book is being significantly reduced.

The Coolmore group was acutely aware of the damaging effect of the credit crunch on its business model. With no Maktoum support, almost all Coolmore’s customers would be affected by the economic changes. Coolmore hoped to mitigate the impact on its stud fees, particularly for the high-priced Galileo, by contacting its clients very early and encouraging them to get their mares booked. In addition, Coolmore was noticeably less active at Keeneland in September, and it appears that its business priorities are focused on buttressing the farm’s stallions that currently hold a pre-eminent position at the European sales. *(Continued on page 2)*

2008 European Auction Review

By Rachel Pagonos

A MIXED BAG

The 2008 European yearling sales suffered the same battering that rocked markets worldwide from Target to Christie’s, and sales dropped as the year wore on. That was the overall picture. Individually, however, the European yearling sales put up widely differing performances. In some cases this was due to timing — pre- or post-Lehman Brothers collapse — and in other cases it was due to the dynamics involving Coolmore and Darley, the global breeding empires.

Because of these differences, it would probably be misleading to put a figure on the overall decline in sales at the four major European yearling auctions — Arqana’s August Yearling Sale in Deauville; the Doncaster Bloodstock Sales St Leger Yearling Sale, in Doncaster, England, also in August; the Goffs Million Sale in County Kildare, Ireland, from the end of September to the beginning of October; and the Tattersalls October Sales, Books 1-3, in Newmarket, England. Moreover, the overall figure would entail conversions of currencies that fluctuated considerably against each other, as well as against the dollar, during the 12-month period, so the best way to

paint the big picture may be to draw the smaller pictures first.

Two of these sales took place before the Chapter 11 filing of Lehman Brothers bank, which occurred at the start of the second week of Keeneland’s September yearling sale and was the first of a string of failures or near-failures of major financial institutions in the U.S. and Britain. Happily, the Deauville auction was held a full month before that fateful Monday and escaped the financial tsunami.

Arqana’s was remarkably the only one of the four sales to post gains in gross, average, or median. From a catalog unchanged in size since 2007, the auction enjoyed a 6.7% increase in gross, a 13.2% rise in average, and a 16.7% jump in median. Furthermore, the buyback rate rose by less than 2 percentage points, and was the lowest of any of these sales at 23.2%.

The timing of the sale was crucial to its success. Arqana did a commendable job of attracting buyers of the international luxury category by improving its catalog and conducting an aggres- *(Continued on page 3)*

2009 European Stud Fees

(Continued from page 1)

While the Maktoums' embargo against Coolmore-sired weanlings, yearlings, and in-foal mares continues, it is a different matter when it comes to non Coolmore-owned racehorses. With Galileo now firmly established as the leading sire in Europe, Darley purchased his two best-performed sons, acquiring the Jim Bolger-owned and -trained pair **Teofilo** and **New Approach**. The purchase of the latter — initially 50% from his breeder Seamus Burns as a juvenile and remaining interest from his trainer at 3 — looks particularly significant. It took Sadler's Wells many years to produce a worthy successor and it may take equally long for Galileo, but in New Approach Sheikh Mohammed's Darley operation has an exciting addition to a stallion operation that has long been overshadowed by Coolmore. Furthermore, the Breeders' Cup Classic (gr. I) success of the Stonerside Stable-bred **Raven's Pass** and the emergence of Kentucky-based Street Cry will also help bridge the gap.

Both Coolmore's and Darley's number of stallions have remained very similar to 2008 numbers. However, with the exception of the stallions with a "private" stud fee and newcomer **Duke of Marmalade**, all Coolmore stallion fees have been reduced between 20% and 40%, with most stallions being cut by a third. Darley's stallion roster, as published on its Web site, has dropped to 29 for England, Ireland, and France. It relocated stallions but has new entries in New Approach, **Ramonti**, and **Raven's Pass**. Darley raised the fees on two successful first-crop sires (Exceed And Excel and Kheleyf) and reduced the fees on 19 others. Darley's stud fees are lower than Coolmore's, but the fact that new sires New Approach (£30,000) and **Raven's Pass** (€40,000) are its most expensive stallions in England and Ireland, respectively, indicates the lack of a leading proven sire in its roster.

Although Coolmore and Darley are the dominant players in the European stallion market, their split has benefited other operations standing major sires popular with all buyers. Two "independent" farms with leading stallions are Juddmonte and Cheveley Park. The former reduced the fee of **Dansili** by 13% from £75,000 to £65,000, whereas Cheveley Park's **Pivotal** reduced from £85,000 to £65,000 — a reduction of 24%. Cheveley Park halved the price of **Medicean** from £30,000 to £15,000 and also trimmed the price of Pivotal's successful son **Kyllachy** by 17% from £12,000 to £10,000. Juddmonte, meanwhile, kept the fees for second-season sire **Oasis**

Dream (£30,000) and **Zamindar** (£15,000) unchanged from last year, despite the latter's successes in France with **Zarkava**. Another neutral stud is the Irish National Stud, which reduced its

Galileo

COURTESY OF COOLMORE STUD

leading stallion **Invincible Spirit** by 33% from €75,000 to €50,000. The Aga Khan's operation is not noted for a large number of stallions, but it has a rising star in **Dalakhani**, whose fee it had initially considered maintaining at €40,000; however, demand was such that an increase to €50,000 appears more than reasonable.

Dalakhani had two group I winners in 2008 and that number was matched by another second-crop sire in Shadwell's **Nayef**, but the farm announced its fees early and

his fee of £15,000 appears the "bargain" for 2009. Shadwell was overrun with applications, but Sheikh Hamdan generously kept the fee unchanged. Shadwell was actually one of the few farms to reduce fees later in the year: both **Haafhd**'s and **Sakhee**'s fees were reduced to £8,000 in December, down from an initially advertised fees of £12,000 in October.

2009 European Stud Fees

Stud Fee	2009 Avg. Fee (No. Sires)	2008 Avg. Fee (No. Sires)	2007 Avg. Fee (No. Sires)	% Chg 08-09	% Chg 07-09

* The conversion rates for the numbers above are as follows: 2009 €1 = \$1.3277 and £1 = \$1.4672.

will significantly damage a stallion's commercial appeal, nevermind a lack of racing success.

The *Blood-Horse MarketWatch* statistics indicate a 7% decline in stud fees from 2008 to 2009. But the effect is more significant than a 7% decline because the gross amount spent will be considerably less on account of a very high number of broodmares likely to be taken out of production. This will particularly affect the stallions in the low fee range, whose support will dwindle dramatically. One can only speculate about the gross decline in stallion revenue at this time as many breeders are still undecided where to send mares and how much to spend. The closer the breeding season comes, the more "flexible" stallion farms are likely to become. So while most stallion fees may have been reduced by a third from last year, additional reductions and concessions are very likely. What will be interesting to find out in 18 months time is whether the foal crops are reduced to a level appropriate to the demand. ^W

sive and well-targeted PR campaign leading up to the sale. It all might have been in vain, though, had the auction taken place after the art and super-prime property markets — other international luxury sectors — began crumbling later in the year. As it turned out, Deauville drew three important buyers who had not bought at the seaside resort in 2007 — Sheikh Mohammed, represented by agent John Ferguson; Prince Mitab bin Abdullah bin Abdul Aziz Al Saud of Saudi Arabia, buying as SKAS; and Nathan Tinkler of Australia, represented by agent Bertrand le Metayer. Together their purchases made up one-fifth of the sale gross.

Nonetheless, the auction did not gain in one notable area — the top. The high price fell from €1,400,000 to €770,000 (for a Galileo colt out of the Darshaan mare Olympic Girl, one of Tinkler's two purchases). And there were the same number of horses sold for €500,000 and up as in 2007. The market was even weaker in the lower end, with the number of yearlings sold from €30,000 to €124,999 falling by 20.9%. It was the upper-middle market, from €125,000 to €499,999, that really blossomed, with nearly 50% more hips sold in that range than in 2007.

The auction was followed a week later by the DBS St Leger sale, which just preceded Keeneland and, coincidentally, recorded changes in gross, average, and median that were very similar to Keeneland's. DBS lost 14.4% in gross, compared to 14.8% for Keeneland; it dropped 11.0% in average, compared to 10.2% for Keeneland; and it fell 11.6% in median, just off the 11.9% drop in Keeneland's median. Because Keeneland took place before the full effect of the financial markets' collapse, it seems reasonable to assume the yearling market was indeed down by these percentages at that time. No other major changes to the market were visible at Doncaster, although its top end — lower than Arqana's — fell. Despite an increase in high price from £185,000 to £220,000, the number of six-figure horses dropped from 22 to 14.

The Goffs Million and Tattersalls October sales were held just as the economic news was going from bad to worse. Yet while the Million's figures took a mighty whack, with gross, average, and median all plummeting by 34-40%, Tattersalls held up relatively well. Tattersalls' Book 1, which took place over three days during

the second week of October, was in fact resilient, with a drop of less than 5% in average and a gain of 6.3% in median. The relatively good results, however, were not due to timing or other random good fortune. It was due instead to the will of Sheikh Mohammed, who visibly supported the British bloodstock industry in its time

of trouble. The sheikh's agent, John Ferguson, bought 51 horses worth 9,342,000 guineas in Book 1 — a 39% increase on his previous sale purchase record of 6,745,000 guineas for 23 hips in 2006. Sheikh Mohammed's brother, Sheikh Hamdan, contributed another 4,440,000 guineas, while Rabbah Bloodstock, a group of the ruling family's

friends and associates from Dubai, spent 1,763,000 guineas for 32 horses. All told, the Dubai contribution to Book 1 was 15,545,000 guineas, more than 30% of the sale's gross.

Goffs was negatively affected by the flip side of this coin. The Million sale in Ireland is dominated by Coolmore sires, which made up 40% of the catalog. Darley, in its well recorded rivalry with the Irish group, is not in the market for these yearlings. So the sale is also especially dependent on Coolmore as a buyer. Coolmore, however, reduced its spending at the Million, from €8,640,000 in 2007 to €4,390,000 in

2008. With decreased activity from other Irish buyers, who were hard hit by the bursting of their property bubble, something had to give. The sale suffered major declines in every price tier but the very lowest — from €30,000 on down. The worst-performing tier was from €500,000 and up, where the number of horses sold dropped from seven to three.

Despite the ills of Ireland's commercial breeding industry — exacerbated by years of overproduction — Coolmore's Irish-based sires continued to dominate the top tier at all the select sales. Galileo had the top price at Deauville for the second year running while two Montjeu colts shared the high price at Tattersalls October Book 1, and a colt and a filly by Danehill Dancer brought the two highest prices of Book 2. Coolmore sires had a lock on the Million sale. The top 14 prices were for horses by Danehill Dancer, Galileo, Montjeu, Oratorio, and Sadler's Wells. ^W

2009 EUROPEAN STALLIONS

Pages 4 to 11 show 2009 stud fees for stallions standing in England, France, Germany, Ireland, and Italy, when such information is available. Poa means price on application. Five tables divide sires by first foal crop year (sires with fees of \$2,500 and higher). The table beginning on page 6 includes only stallions with at least two foal crops to race in 2007. All stud fees are converted into U.S. dollars with the following conversion rates: 1 British pound (£) = \$1.4672 and 1 Euro (€) = \$1.3277. The heading of 2008 foals includes only foals born in England, Ireland, and Germany. The number of French foals is unavailable. Yearling medians and averages were supplied by **Racing Post** and include major North American sales and 18 auctions in Europe. Weanling medians and averages were also supplied by **Racing Post** and include Goffs November and Tattersalls December. All racing statistics are from a percentage of lifetime named *Northern Hemisphere* foals, except dirt winners (Drt Wnrs), which are a percentage of dirt runners. Racing statistics cover the *Northern Hemisphere* only, except for stakes winners, which are a worldwide statistic. Earnings do NOT include Japan or Hong Kong racing. Abbreviations in the tables include Rnrs (Runners), Wnrs (Winners), 2yo Wnrs (2-year-old winners), 3yo Wnrs (3-year-old winners), 4yo+ Wnrs (4-year-old and up winners), SW (Stakes Winners), GSW (Graded/Group Stakes Winners), G1SW (Grade/Group I Stakes Winners), AEI (Average Earnings Index), CI (Comparable Index), AWD (Average Winning Distance in furlongs), Level Won (Highest class of race a stallion has won; G1 (Group I), G2 (Group II), G3 (Group III), and Min. and Max. WD (Minimum and Maximum winning distance in furlongs). Yrlgs. Profit. refers to the number of yearlings sold in 2008 for a profitable price. Yearlings that sell for prices (minus sales commission) greater than two times the 2006 stud fee, plus \$15,000, are considered profitable. Wnlgs. Profit. shows the number of 2008 weanlings to sell for a profit. Weanlings that sell for prices greater than two times the 2007 stud fee, plus \$7,000, are considered profitable. % Offered shows the percentage of weanlings or yearlings that sold for a profit from the number offered. The percentages of 3yo Wnrs and 4yo+ Wnrs count only named foals that are at least 3- and 4-year olds, respectively. DBW is the best level won by a sire's dam. N/A means data not available. All racing statistics through Jan. 13, 2009. For more information on European sales and sires see the **Racing Post's Bloodstock Review** at www.racingpost.com.

BRACING FOR A FALL

No one seems to be wondering whether the 2-year-olds in training sale season will be down this year. The question instead is how far down.

Poor results from the fall and winter sales of 2008 are not encouraging. The rate of return (ROR) on weanling-to-yearling pinhooks fell nine percentage points between 2007 and 2008, dropping from a losing 2% in 2007 to a losing 11% this year. At the Keeneland September Yearling sale, the average price for all yearlings was down 10.2% (to an average of \$90,985) and down 12.4% for the select yearlings (to \$377,857). Because Keeneland September's select sessions took place prior to Sept. 15 when the once-prestigious investment bank Lehman Brothers declared bankruptcy, it might be assumed that 12% was a legitimate decline for the North American yearling market. The mid-September U.S. financial crisis that shook markets worldwide meant more bad news for the Keeneland November Breeding Stock sale, where the average price of weanlings fell 20.5% to \$48,544, and the average price of broodmares dropped 48.5% to \$64,695.

These grim results do offer a glimmer of hope for the 2-year-old sales. The horses that were the farthest removed from the racetrack were the ones that experienced the greatest decline in average price. Broodmares, the "factories" of the Thoroughbred business, saw the greatest decline in average price. Weanlings fared slightly better and the yearlings a bit better still. The closer a young horse is to racing age, the less risk and expense an owner assumes. If the yearling market was down 12% prior to the collapse of the global markets, then it would be reasonable to assume that the decline in the 2-year-olds overall will be 7-10% and probably a bit more to account for the greater financial uncertainty of the times.

A 12% decline would mean the collective average price falls to \$71,580 from \$81,340 for eight of the country's major 2-year-olds

in training sales (see the chart below). The ROR for those juveniles that are pinhooked could drop to around 25% from 38% last year. If buyers are even more selective than usual and demand weakens further for the middle- and lower-market horses, then the worst-case scenario is a drop of 15% to \$69,140, and the ROR for pinhooked horses would drop to around 21%.

Tom Ventura, general manager of the Ocala Breeders' Sales Co., is expecting a market correction, but he isn't expecting a major correction.

"The economy will have an impact," Ventura said. "But the 2-year-old sales are a bit different than the others. We are selling to the end-user. These horses are going to the racetrack." He said this makes a big difference in how the buyers assess these horses' value.

"It's based on how much they can earn at the racetrack," Ventura said. "The purses in Pennsylvania and Louisiana have picked up. Now you have New York on the verge of instituting slots, and we're making progress between the ADWs (advanced deposit wagering companies) and the horsemen. I think there is a lot to be positive about."

OBS is also in a unique position among the country's major juvenile sales. The Ocala, Fla.-based company could watch the average price drop 15% at its select sales on Feb. 17 and on March 17-18 and still see growth. OBS' February and March sales of 2008 were the only sales among the eight major sales to report double-digit growth in both average price and median. The average price at the February sale increased 17.9% to \$157,640 and the median jumped 25% to \$125,000. In March the average grew an amazing 36.6% to \$143,262 and the median increased 22% to \$100,000.

"We are coming off a year with dramatic increases for our first two sales," Ventura said. "If we can come close to those numbers, we'll be fine." ❧

2-Year-Olds in Training Consignors, 2001-2005

The table below lists consignors that offered 18 or more 2-year-olds at North American sales from 2001 through 2005. The information shows the number of horses offered, the number sold, average purchase price, average earnings per runner, number of horses to earn more than their purchase price (E>P), runners, winners, 2-year-old winners, stakes winners, graded stakes winners, grade I stakes winners, horses to earn \$100,000 or more, Average Earnings Index (AEI), and average starts per runner. Racing statistics are from North America, Europe, UAE, Japan (JRA only), and Hong Kong. Earnings from other countries may be incomplete. Earnings from Japan and Hong Kong are NOT included. The percentages for each category are derived from number of 2-year-olds offered. All statistics except average price include horses that did not meet their reserve price. Racing statistics are through Jan. 13, 2009.

2-Year-Olds in Training Buyers, 2001-2005

The table below lists buyers of 11 or more 2-year-olds in training at North American sales from 2001 to 2005. Racing statistics are from North America, Europe, UAE, Japan (JRA only), and Hong Kong. Earnings from other countries may be incomplete. Earnings from Japan and Hong Kong are NOT included. The information shows the number of horses purchased, the percentage exported, total purchase price, average purchase price, average earnings, number to earn more than their purchase price (E>P), runners, winners, 2-year-old winners, stakes winners, graded stakes winners, grade I stakes winners, purchases to earn \$100,000 or more, Average Earnings Index (AEI), and average starts per runner. The percentages for each category are derived from a buyer's total purchases. Racing statistics are through Jan. 13, 2009.

Buyer	No. Bought (% Exp.)	Total Price	Avg. Price	Avg. Earnings	E>P	Rnrs (% Bght)	Wnrs (% Bght)	2yo Wnrs (% Bght)	SW (% Bght)	GSW (% Bght)	GISW (% Bght)	\$100k+ Earners	AEI	Avg. Starts

For stallions that stand, will stand, or stood (deceased) in Europe and North America (stallions exported prior to the 2004 breeding season are excluded), and have runners in North America. Listed above are all available statistics for the Northern Hemisphere through Jan. 21, 2009. As supplied by The Jockey Club Information Systems, Inc., earnings exclude monies from Japan and Hong Kong. Foal counts include Southern Hemisphere. Cumulative stakes winners include all countries; some additional foreign foals may be included in the foal counts.

FIRST-YEAR SIRE REVIEW

New Sires with Fees of \$10k and Up

Curlin (2004, Smart Strike — Sherriff's Deputy, by Deputy Minister) retires to stud as the highest ever U.S.-trained money earner. He is by a Mr. Prospector son who started his career as a mid-range stallion, but has worked his way to the top of the ladder, and was leading sire for 2007 and 2008. Out of a Deputy Minister mare, Curlin is a product of the Mr. Prospector/Northern Dancer cross, but he should do well when bred back over Northern Dancer, particularly through Danzig (who sired superstar Dance Smartly out of the dam of Smart Strike) and Northern Dancer/Sir Ivor (Sir Gaylord) or Northern Dancer/Secretariat crosses.

We didn't get to see Curlin and his rival for 2008 Horse of Year honors, **Big Brown** (2005, Boundary — Mien, by Nureyev), meet on the track. Because they are retiring in the same season, however, we can at least enjoy a battle for supremacy as sires. Big Brown's sire, Boundary, was a speedy and not particularly sound son of Danzig. He was no more than a useful sire but did get two other grade/group I winners, the sprinters Minardi and Pomeroy. Big Brown's dam, who comes from the same family as champion older mare Hidden Lake, is a Nureyev mare inbred to the sister/brother Thong and Lt. Stevens. Big Brown's own pedigree owns an intriguing pattern as both Boundary's dam and Big Brown's third dam are by Damascus out of mares by Round Table. He's free of Mr. Prospector and Seattle Slew, two lines that would have appeal here. He should also like any injections of the Rough Shod II family.

Henrythenavigator (2005, Kingmambo — Sequoyah (IRE), by Sadler's Wells), owns a classic pedigree, but was precocious enough to capture the Coventry Stakes (Eng-II) over six furlongs at Royal Ascot at 2, in a new course record. At 3, he took in succession the Stanjamesuk.com Two Thousand Guineas (Eng-I), the Boylesports Irish Two Thousand Guineas (Ire-I), the St. James's Palace Stakes (Eng-I), and the BGC Sussex Stakes (Eng-I). Those races saw him twice defeat five-times group I winner New Approach (IRE) and gain three victories over 2008 Breeders' Cup Classic (gr. I) victor Raven's Pass. He ended his career with an excellent second in the Classic when making his only start on a synthetic surface. Bred on the Mr. Prospector/Northern Dancer "mega-cross," Henrythenavigator is inbred to Northern Dancer, but the position and distance allow for more of that strain. He's also open for another cross of Kingmambo, that with mares from the Seattle Slew line.

War Pass (2005, Cherokee Run — Vue, by Mr. Prospector) was an exceptional juvenile champion, winning all four of his starts, including the Champagne Stakes and Bessemer Trust Breeders' Cup Juvenile (both gr. I), the latter of which he took by nearly five lengths. He only started three times at 3 but won an allowance event and was a close and courageous second in the Wood Memorial Stakes (gr. I) after being tackled by a "rabbit." His sire, a champion sprinter, is a grandson of Blushing Groom (FR). His dam bred another juvenile

grade I winner in Oath, a daughter of Known Fact. War Pass should be interesting back over mares descending from his broodmare sire, Mr. Prospector, and he's free of Northern Dancer.

A member of the first crop by his sire — as are Street Sense and Zenyatta — **Street Boss** (2004, Street Cry (IRE) — Blushing Ogygian, by Ogygian) matured into a stellar sprinter in 2008. Street Boss comes from a branch of a (French breeder) Marcel Boussac family that has most recently flourished in Germany. His granddam is also a half-sister to world traveler Running Stag. A look at his pedigree shows that he is completely free of Northern Dancer, a strain that has been exceptional for his sire and grandsire.

Curlin

The versatile **Heatseeker (IRE)** (2003, Giant's Causeway — Rusty Back, by Defensive Play) set track marks from seven to 10 furlongs. By the leading sire son of Storm Cat, out of a half-sister to grade I winner Spanish Fern, he's from the family that also produced group I winners Al Bahathri and Haafhd. Out of a mare descending from Mr. Prospector through Fappiano, he's likely to enjoy meeting mares from other branches of the Mr. Prospector line. Nijinsky II is going to be another good strain to bring in here.

Hopeful Stakes (gr. I) winner **Majestic Warrior** (2005, A.P. Indy — Dream Supreme, by Seeking the Gold) is the only son of his sire to take an event at the highest level over less than a mile. Majestic Warrior (whose first two dams are the grade I-winning Dream Supreme and Spinning Round), looks an interesting horse to breed to mares with the Mr. Prospector/Northern Dancer or Northern Dancer/Mr. Prospector cross (or by stallions bred on those crosses), and bringing in Storm Cat (bred on a similar cross to this horse's second dam), is highly-recommended.

Champion sprinter and twice Breeders' Cup Sprint (gr. I) victor **Midnight Lute** (2003, Real Quiet — Candytuft, by Dehere) is another who should like Storm Cat-line mares (Storm Cat's pedigree echoing the Northern Dancer/Secretariat cross in his broodmare sire, Dehere). Incidentally, despite his speed, Midnight Lute not only is by a Kentucky Derby (gr. I) winner, but actually comes from a European family. His granddam, graded stakes winner Bolt From the Blue, is out of Berkut (stakes-winning sister to Gyr, runner-up in Nijinsky II's Epsom Derby) and is half-sister to Grand Criterium (Fr-I) victress Alydar's Best. In addition to Storm Cat, another promising strain to add here is Northern Dancer.

The prematurely-deceased Chester House (a Mr. Prospector half-brother to Empire Maker, both stallions produced by the recently-passed 2002 Broodmare of the Year Toussaud) made a relatively quiet start to his stud career but exploded as a stallion in 2008. One of his stars was **Divine Park** (2004, Chester House — High in the Park, by Ascot Knight), who took the Westchester Handicap (gr. III) by five lengths and captured the Metropolitan Handicap (gr. I) a few weeks later. The previous year he had set a track record for seven furlongs at Keeneland, and had also won the Withers Stakes (gr. III) at Aqueduct.

Coincidentally, the next horse we come to, grade I-winning sprinter **First Defence** (2004, Unbridled's Song — Honest Lady, by Seattle Slew), also has a pedigree connection to Empire Maker. His dam is a grade I-winning half-sister to that horse, and he is by a son of Empire Maker's sire, Unbridled. With only one distant strain of Northern Dancer, that line, including through Storm Cat, remains a good option here, as does breeding back to mares by sons and grandsons of Seattle Slew (Empire Maker already has a grade I winner on this cross).

Student Council (2002, Kingmambo — Class Kris, by Kris S.) proved to be an inspired purchase for Millennium Farms owner Ro Parra, carrying his colors to wins in three graded events, including the Pacific Classic and Maryland Lottery Pimlico Special (both gr. I). The son of Kingmambo is from a family that has crossed well with A.P. Indy, suggesting opportunity for mares descending from that horse and his sire, Seattle Slew. Student Council is open to virtually all of the strains that have worked with his sire, not least Sadler's Wells.

Donn Handicap (gr. I) winner **Spring At Last** (2003, Silver Deputy — Winter's Gone, by Dynaformer) is by the same sire as 2007 leading freshman sire Posse, and is half-brother to grade I winner Sharp Lisa and multiple graded stakes winner Sharp Susan. His dam has an intriguing pedigree with the brothers His Majesty and Graustark 3 x 2. Posse started well with mares that gave inbreeding to Mr. Prospector (broodmare sire of Silver Deputy), and the Majestic Light strain is another that will be interesting to introduce here.

The most expensive stallion retiring to Florida for 2009 is **Circular Quay** (2004, Thunder Gulch — Circle of Life, by Belong to Me), a graded stakes winner at 2, 3, and 4, including the Hopeful Stakes (gr. I) as a juvenile. His dam, Circle of Life, was also a juvenile star, winning the Spinaway Stakes (gr. I). Circular Quay is inbred to Northern Dancer through Storm Bird, Danzig, and Nijinsky II, and to Raise a Native through Mr. Prospector, Exclusive Native, and Alydar. It will be intriguing to see whether he does best with further infusions of those strains, or as an outcross.

A brother to champion 2-year-old filly Dreaming of Anna, **Lewis Michael** (2003, Rahy — Justenuffheart, by Broad Brush) was a turf stakes winner at 2, and graded stakes winner on the all-weather at 4 and 5. Out of a stakes-winning half-sister to champion turf horse Kitten's Joy, Lewis Michael is free of Northern Dancer (a prime cross for his sire), Mr. Prospector, and Seattle Slew.

The early leader of the Eastern juveniles in his crop, **Ready's Image** (2005, More Than Ready — Clever Phrase, by Clever Trick) won the Tremont Stakes and Sanford Stakes (gr. II), and then finished second in the Hopeful (gr. I). He had a knee chip removed over the winter before adding another sprint stakes on his debut at 3. A Halo-line sire, he's another who is effectively an outcross for Northern Dancer and Mr. Prospector (he has a cross of both, but it will be in the fifth generation of his foals), and his sire enjoyed success when crossed over mares from both lines.

Street Hero (2006, Street Cry (IRE) — Squall Linda, by Summer Squall) broke his maiden when defeating Midshipman for the Norfolk Stakes (gr. I) and was third to that horse in the Del Mar Futurity and Bessemer Trust Breeders' Cup Juvenile

(both gr. I). Out of a graded stakes-placed mare, Street Hero goes back Giff-Gaff, a similarly-bred half-sister to breed-shaper Turn-to. Mares descending from Storm Cat and A.P. Indy look particularly interesting here.

Tiz Wonderful (2004, by Tiznow — Evil, by Hennessy), was unbeaten at 2, winning the Iroquois Stakes (gr. III) and Kentucky Jockey Club Stakes (gr. II). Bred on similar lines to champion 2-year-old filly Folklore, he's out of a mare by a Storm Cat-line stallion, with a dam from the Mr. Prospector line, and this invites mares with Northern Dancer/Mr. Prospector or Mr. Prospector/Northern Dancer crosses.

Brother Derek (2003, Benchmark — Miss Soft Sell, by Siyah Kalem) — a grade I winner at 2 and 3 — represents what may be a last chance for the Alydar branch of the Raise a Native line. Most Northern Dancer and Seattle Slew lines look to be an option here, and inbreeding to his broodmare sire line (Mr. Prospector) might also work.

Harlington, (2002, Unbridled — Serena's Song, by Rahy) a \$2.8 million yearling, gained a graded stakes win in the Gulfstream Park Handicap (gr. II) and has a mouth-watering pedigree. His dam produced group I winner Sophisticat and grade II winner Grand Reward to Storm Cat, and as that horse has done well under Unbridled, we have at least one ready-made cross here.

The very rapid **J Be K** (2005, Silver Deputy — Major Wager, by Valid Wager) is a second major son of his sire to retire this year. This is another horse that will like Mr. Prospector in his mares, and horses with a lot of Man o' War and related War Relic and Eight Thirty in their backgrounds will be a bonus. (Meadowlake is one source of Eight Thirty with a lot of appeal here.)

California sire In Excess (IRE) has one very good Kentucky-based son in Indian Charlie. Now **Notional** (2004, In Excess — Truly Blessed, by French Deputy) bids to follow in that horse's footsteps. He has a rather interesting pedigree as he's inbred 4 x 4 to La Morlaye, the granddam of Siberian Express (sire of In Excess). That mare is from the Myrtlewood family, so Mr. Prospector and Seattle Slew are highly recommended.

We've mentioned several lightly-raced performers in this article, but **Seeking the Dia** (2001, Storm Cat — Seeking the Pearl, by Seeking the Gold), arrived from Japan as the winner of four Japanese graded events, and was twice second in the Japan Cup Dirt (Jpn-I), beaten a nose. His dam, from the family of Lyphard, was twice a grade I winner in Japan and was also champion older mare in Europe. He's bred on an identical sire line nick to the very successful young sire Pure Prize, a horse who has done well when bred back over Mr. Prospector-line mares.

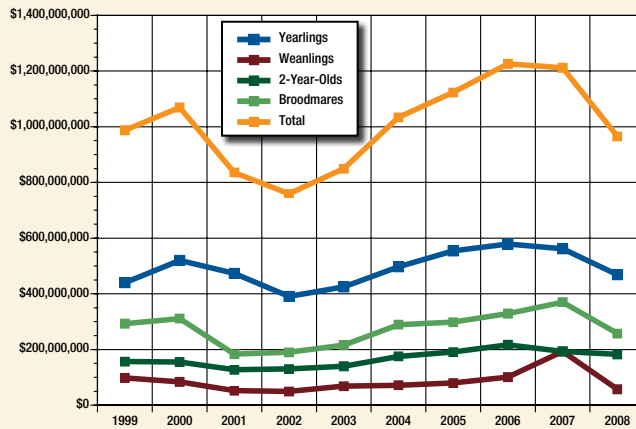

Multiple graded stakes winner **Zanjero** (2004, Cherokee Run — Checkered Flag, by A.P. Indy) is by the same sire as War Pass. His chances at stud must be improved by the fact that he's from the same Blushing Groom (FR) sire line and same immediate family as Primal Force, the dam of the highly-successful sire Awesome Again and that horse's half-brother, champion 2-year-old and promising young stallion Macho Uno. Their sire lines — Deputy Minister and Holy Bull — are prospects here, as is Northern Dancer, who is absent in his pedigree. It could also pay to bring in more Mr. Prospector. ❧

We didn't get to see Curlin and his rival [Big Brown] for Horse of the Year ... meet on the track. However, we can at least enjoy a battle for supremacy as sires.

LEADING Indicators

N. American Gross Sales Revenue, 1999-2008

The line graph below charts the gross revenue of North American public auctions between 1999-2008. Sales include yearlings, weanlings, 2-year-olds, and broodmares. The chart "Dollars in the Auction Market, 2004-2008" provides a more in-depth statistical counterpart to the line graph. In addition to gross revenue, the chart includes the average and median price, number sold, and percentage change between 2007 and 2008 for each category.
